Minimum Skills

ABSTRACT

Results of standardized tests taken by students in the Austin (Texas) Independent School District are reported. Emphasis is on tests developed for the state of Texas, but results from other standardized tests are also reported. In October 1990, 22,443 students in grades 3, 5, 7, 9, and 11 took the Texas Assessment of Academic Skills (TAAS), scoring near state averages and above urban averages and showing an increase in the percentage of students who demonstrated mastery on these criterion-referenced tests. In October 1990 and/or May 1991, 893 students in grades 11 and 12 took the Exit-Level Texas Educational Assessment of Minimum Skills (TEAMS). Austin students ranked first among urban schools on these criterion-referenced tests. In April 1991, 34,676 students in grades 1 through 8 took the Iowa Tests of Basic Skills, while 11,645 students in grades 9 through 12 took the Tests of Achievement and Proficiency. Other tests administered district-wide and reported only at the individual level were: (1) the Metropolitan Readiness Tests (5,695 students in grade 1); (2) the Computer Literacy Test (3,934 students in grade 6); (3) TAAS practice tests (30,150 students in grades 3 through 6); and (4) end-of-basal tests (8,300 students in grades 3 through 6). Students generally scored above the average on national examinations, and continued to show improvement, with achievement of Blacks and Hispanic Americans improving at a faster rate than that of other students. Thirty figures are provided, and nine attachments present 38 pages of tables of results. Five references are included. (SLD)

Central School District

National Average - Standard set by testing across the nation. The 50th percentile is the national average.

Median - The middle score-half the scores are higher, half are lower.

Percentile - The percentage of students who scored lower.
The 50th percentile means 50% of the national norm group made a lower score.

Grade Equivalent - The grade and month of school in which a score would be made by an average student. A year is divided into tenths; ninetenths for the nine months of instruction and one-tenth for the three months of the summer. Example: 7.3 is the score made by an average student in the third month of grade seven.

Composite Score - The combination of the scores of all the subjects. It is only computed for students who took all the tests.

ITBS and TAP Administered in AISD

Students in grades 1 and 2 took these Iowa Tests of Basic Skills (ITBS) subtests:

Word Analysis (letter and word sounds), Vocabulary, Reading Comprehension, Mathematics

- Concepts,
- Problems.
- Computation, and

Language Skills (Spelling).

Students in grades 3-8 took these ITBS tests:

Vocabulary, Reading Comprehension, Language Skills

- Spelling
- Capitalization
- Punctuation
- Usage of Standard English

Work-Study Skills

- Visual Materials (graphs, charts, etc.),
- Reference Materials (directions, etc.),

Mathematics

- Concepts,
- Problems.
- Computation.

Students in grades 9-12 took these Tests of Achievement and Proficiency (TAP) subtests:

Matinematics,
Reading Comprehension,
Written Expression,
Using Sources of Information,
Social Studies, and
Science.

Reporting by Ethnicity

TAAS/TEAMS scores are reported for American Indian, Asian, Black, Hispanic, and White students using the format and scores provided by the Texas Education Agency. Total scores include all five ethnicities.

ITBS and TAP scores are reported for Black, Hispanic, and Other students. Other students include all students who are not Black or Hispanic.

Program Description

Systemwide Testing Program:

- 22,443 students in grades 3, 5, 7, 9, and 11 took the Texas Assessment of Academic Skills (TAAS) in October 1990.
- 893 students in grades 11 and 12 took the Exit-Level Texas Educational Assessment of Minimum Skills (TEAMS) in October, 1990 and/or May 1991.
- 34,676 students in grades 1 through 8 took the ITBS in April, 1991.
- 11,645 students in grades 9 through 12 took the TAP in April, 1991.

Other tests administered districtwide and reported only at the individual student level are:

- 5,695 students in grade 1 took the Metropolitan Readiness Tests (MRT) in September, 1990.
- 3,934 students in grade 6 took the Computer Literacy Test in April 1991.
- 30,150 TAAS practice tests were administered to students in grades 3 through 6 throughout the year.
- 8,300 end-of-basal tests were administered to students in grades 3 through 6 throughout the year.

Major Findings

- AISD's high school graduates continue to excel on college entrance examinations.
- a. AISD had 25 National Merit Scholarship finalists--3.6 times the number that is average for a district this size.
- b. SAT scores for AISD seniors (928) averaged above those of the state (874) and the nation (900).
- AISD students score near the state averages, above urban averages, and continue to rise in the percentage who demonstrate mastery on the TAAS.
- For the sixth year in a row, AISD students ranked number one among the eight urban districts on the exitlevel state-mandated criterionreferenced test (TEAMS, TAAS).
- AISD's ranking among the eight urban districts in reading at grade 7 improved from third to first.
- c. In comparison to Texas urban averages, AISD's TAAS mastery percentages are higher in 18 areas, the same in 0, and lower in 2.

- d. In comparison to state averages, AISD's TAAS mastery percentages are higher in 5 areas, the same in 4, and lower in 11.
- e. Out of 3,007 potential high school graduates, 98.9% (all except 33) passed both sections of the Exit-Level TEAMS.
- AISD is an urban district whose students generally score above the national average on standardized achievement tests and continue to improve annually.
 - a. In 1990-91, 57 out of 68 AISD average test scores were at or above the 50th percentile (the national average).
 - b. In comparison with 1989-90, 48% of the District averages went up, 18% stayed the same, and 34% went down.
- c. In general, Black and Hispanic student achievement continued the ten-year trend of improving at a faster rate than that of all other students on the ITBS and TAP. achievement tests.

What is the Texas Assessment of Academic Skills (TAAS)?

The TAS tests are criterion-referenced tests (CRT). A CRT is designed to measure a well-defined set of skills and to reference the student's score to a mastery criterion for that set of skills. In the case of the TAAS, the skills measured are a subset of the Essential Elements adopted by the State Board of Education.

A basic skills assessment program has been mandatory in Texas since 1980. This program has been implemented in five-year cycles. The first cycle consisted of the administration of the Texas Assessment of Basic Skills (mathematics, reading, and writing) to students in grades 3, 5, and 9, from 1980-81 to 1984-85. The second cycle consisted of the administration of the Texas Educational Assessment of Minimum Skills to grades 1 (1985-86 to 1988-89), 3, 5, 7, 9, and 11 (1985-86 to 1989-90). Mastery of the 11th-grade (Exit-Level) TEAMS became a requirement for graduation for all students receiving a high school diploma from Texas public schools in 1985-86. Because of this, students at grades 11 and 12 were allowed to continue taking the test every time the test was offered until they demonstrated mastery.

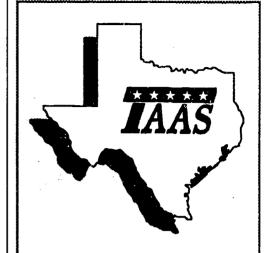

School year 1990-91 is the first year of the third testing cycle and it consists of the administration of the TAAS to students in grades 3, 5, 7, 9, and 11. According to the Texas Education Agency (TEA), the focus of the TAAS represents a shift from an assessment of minimum skills to an assessment of academic skills.

"The scope of the content eligible for testing has been broadened to include a more comprehensive assessment of the instructional targets delineated in the essential elements. The TAAS tests assess higher-order thinking skills and problem-solving ability."

An equating study conducted in AISD (Attachment 1) supports the notion that the TAAS is harder than the TEAMS. The study indicates that the mastery level of TAAS is from 2 to 13 months (in grade equivalents) higher than the TEAMS. Therefore, percent mastery on the TEAMS cannot be compared directly to percent mastery on the TAAS.

The first year, the test included only writing, reading, and mathematics; social studies and science tests will be added to the TAAS in October 1992 (grade 9), October 1993 (grades 5 and 7), and 1994 (grades 3 and exit level). Mastery of the exit-level test at grade 11 continues to be a requirement for graduation.

In addition to the new subtests, the mastery criteria for the following years are expected to increase, making it harder to pass the TAAS test.

How Did AISD Students Perform on the TAAS?

TAAS results for the first year of the testing cycle can be best interpreted in relation to statewide scores and scores of the other seven urban districts in Texas. Figure 1 presents a summary of these comparisons. In general, AISD performs higher than the urban average and at or below the state level.

Figure 1 AISD TAAS Results in Comparison to the Urban 8 and Texas

ĺ	Ur	ban 8	Te	xas
	Mastery	Recognition	<u>Mastery</u>	<u>Recognition</u>
AISD is:				
Higher	18	18	5	8
The Same	0	2	4	6
Lower	2	0	11	6

- NOTES: All TAAS comparisons presented in this report were done with scores for nonspecial education students unless otherwise indicated. TEA uses non-special education student results for identifying exemplary schools and schools in need of improvement.
 - The twenty comparisons analyzed are writing, reading, mathematics, and all tests at grades 3, 5, 7, 9, and 11.

AISD continues to outscore the Urban 8 and Texas in the exit-level test as was the case with the TEAMS for the past five years. Figure 2 shows the rank of AISD among the Urban 8 in Writing, Reading, Mathematics, and ALL TESTS.* A table including percent mastery for AISD, the Urban 8, and Texas, by ethnicity is presented in Attachment 2.

	AISD F	Figure 2 Ranks Among TAAS 1990	the Urban 8	
GRADE	WRITING	READING	MATHEMATICS	PASSED ALL TESTS TAKEN
3 5	3 2	2 2	2 2	2 2
7 9 11	5 5 1	1 3 1	2 3 1	2 3 1

^{*}This year TEA is reporting ALL TESTS TAKEN for academic mastery and ALL THREE TESTS for academic recognition.

Figure 3 presents the 1991 TAAS scores for AISD, the Urban 8, and Texas. In AISD, the highest areas of achievement in terms of percentage of students mastering the TAAS are writing at grade 11 and reading at grades 3 and 11. The highest areas of achievement in terms of rank among the Urban 8 are writing, reading, and mathematics at grade 11 and reading at grade 7.

The lowest areas of achievement in terms of percentage of students mastering the TAAS are writing at grade 9, reading at grade 7, and mathematics at grades 7 and 9. The lowest area of achievement in terms of rank among the Urban 8 is writing at grades 7 and 9.

A separate section of this report presents the scores for the writing samples and a summary of the analytic scoring of the papers with a failing score, results by campus are presented in Attachment 9 of this report.

^{*} Passed all tests taken for academic mastery and passed all three tests for academic recognition.

How Does This Year's Performance on the TAAS Compare with Last Year's Performance on the TEAMS?

TEA conducted an equating study to derive TEAMS-equivalent scale scores for the 1990-91 TAAS. The TEAMS-equivalent scale scores were derived by matching the scale score frequency distributions for the TAAS and the TEAMS tests. This equipercentile equating procedure assumed no growth at the state level. These TEAMS scale scores were reported only at the campus and district level. Figure 4 presents the TEAMS scale scores for AISD. A summary of the changes in scale scores for AISD and Texas is presented in Figure 5. For a complete table including the TEAMS scores for the State, see Attachment 2.

At the campus level, a more appropriate longitudinal assessment of performance on the state-mandated criterion-referenced test is to compare the relative standing (rank) of each school among all other schools both last year and this year (Attachment 9).

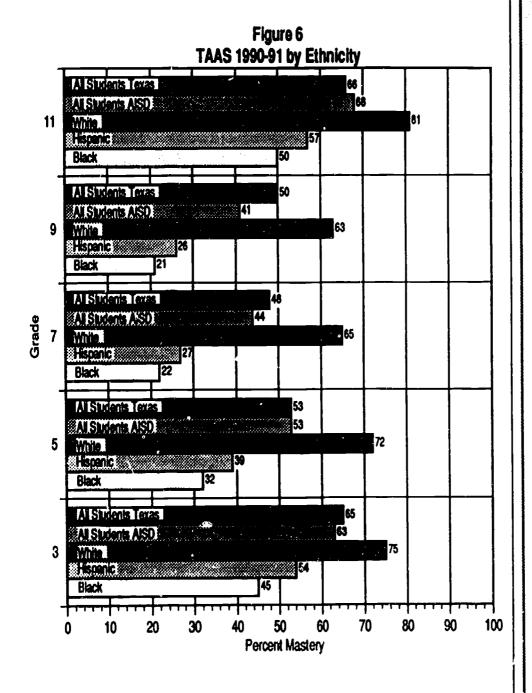

Figure 4 Equivalent Scale Scores All Students Tested												
Writing Reading Mathematics Grade TEAMS TAAS TEAMS TAAS

In 1990-91 the scale scores are:	Higher	The Same	Lower
AISD	2	1	14
TEXAS	2	0	15

How Did AISD Students Perform by Ethnicity* on the 1990-91 TAAS?

TAAS results in AISD follow the statewide pattern of achievement among the ethnic groups. White students achieve higher than both minority groups, while Hispanic students perform generally better than Black students. Figure 6 presents the results by ethnicity for *All Tests Taken*. The results for each of the subject areas follow similar patterns and are presented in Attachment 3.

See inside front cover for definitions.

How Did AISD Students Perform on the TAAS Written Composition?

The written composition has been the lowest scoring area of the statewide test for the last six years. The Exit-Level TAAS includes a written composition test that must be passed before a student can obtain a high school certificate. Figure 7 presents the written composition scores for students in AISD and Texas.

Figure 7 TAAS 1990-91 Written Composition Scores

(Percentage of Students Obtaining Each Score)

		Failing	Scores		Passing Scores								
	0		1 1		2		3		4				
Grade	AISD	Texas	AISD	Texas	AISD	Texas	AISD	Texas	AISD	Texas			
3	0	0	20	16	53	50	24	29	4	5			
5	0	0	8	8	40	41	44	42	8	8			
7	1	0	19	13	47	46	27	34	6	7			
9	1	1	32	21	41	38	23	34	4	6			
11	0	0	13	15	39	38	43	41	5	6			

Figure 8 Reasons for Failing the Written Composition TAAS 1990-91

	Grade							
Deficiency	9		11					
•	#	%	#	%				
Lacked support and/or elaboration:	1496	94	363	95				
Used wrong purpose/mode:	413	26	54	14				
Lacked organization or structure:	139	9	38	10				
Lacked language control:	147	9	41	11				
Did not write anything:	1	C	1	0				
Wrote off topic:	5	0	2	6				
Other:	35	2	6	2				
			•					

At grades 9 and 11, failing written compositions (scores 0 or 1) are scored analytically to determine specific deficiencies. Figure 8 is a summary of the analytic scoring results for the 1990-91 TAAS.

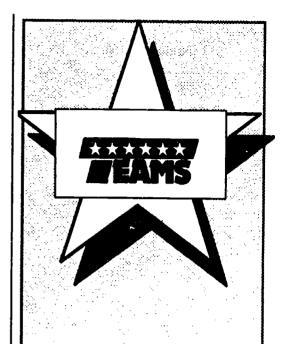

Exit Level

The class of 1991 is the last class to graduate under the TEAMS requirements. Students who became juniors between September, 1985 and September, 1989 had to master the mathematics and the language arts sections of the Exit-Level TEAMS before receiving a high school diploma. Students not mastering the Exit-Level TEAMS on the first attempt were required to take the test as many times as necessary to demonstrate mastery. These students were strongly encouraged to participate in remedial education programs offered in AISD, designed to prepare them to pass the test. Results of the previous five years of the Exit-Level TEAMS indicate that AISD students pass the test at a higher rate than students in the State as a whole.

The group of students taking the Exit-Level TEAMS in 1990-91 is considerably smaller and different than in previous years. Because most of these students are being retested, their results can only be compared to the results of students retested in the past. Figure 9 shows the results for the students retested in 1990-91, in comparison to 1989-90. The results are presented in terms of the number of students who have not met mastery and, therefore, cannot receive a high school diploma.

Figure 9 Exit-Level TEAMS Retested Students

Year	Subject		Non-Mastery	
		#Tested	Number	Percent
89-90	Mathematics	630	237	38%
	Language Arts	290	126	43%
90-91	Mathematics	402	219	54%
	Language Arts	160	72	45%

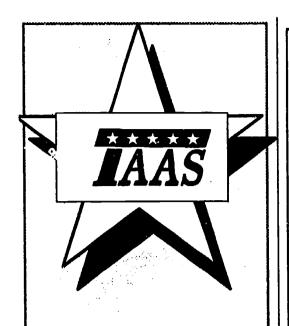

Figure 10 1990-91 Exit-Level TAAS

New to Texas after			
October, 1990			
Writing	244	147	60%
Reading	253	52	21%
Mathematics	241	102	42%

The 1990-91 junior class is the first class to graduate with the TAAS requirement. For the next five years, mastery of the Exit-Level TAAS is required for graduation from a Texas public school. The District is required to offer remedial courses and programs to all the students who fail the TAAS. Students not mastering the TAAS are encouraged to register in those courses and programs. Figure 10 shows the number of students who failed the TAAS and, therefore will have to retake it and pass it before they can receive a Texas high school diploma.

The students who did not master the 1990-91 TAAS and must take it again, will be locked at the same criterion used this year. Subsequent groups will be required to pass the test with higher scores and with added areas. The State Board of Education sets the passing criteria for the TAAS. It is expected that for 1991-92, the passing criterion will be 70% of the items correct for all tests at all grades.

How Many AISD Students Were Denied a Diploma Because They Did Not Pass the Exit-Level TEAMS?

33 out of 3,007 potential graduates

In AISD, 3,007 students who were required to take the Exit-Level TEAMS completed all other requirements for graduation. Thirty-three of these students did not pass the Exit-Level TEAMS and were denied a diploma. Approximately 4% of the graduates were not required to pass the TEAMS because they were exempt (special education) or because they were seniors before the requirement came into effect.

Figure 11 presents a profile of the 33 students who were denied a diploma because they did not master one or both of the sections of the Exit-Level TEAMS:

How Did Limited-English-Proficient (LEP) Students Perform on the TAAS?

As shown in Figure 12 below, the greatest percentage of students mastering the TAAS in AISD occurred at grade 3. The lowest percentage mastering occurred at grades 7 and 9.

ζ.

In Figure 13 below, AISD LEP students are compared to LEP students statewide. At grade 3, a greater percentage of AISD LEP students mastered all TAAS tests taken than did LEP students statewide. At all other grade levels, however, AISD LEP students scored lower. The largest discrepancy occurred at grade 9 where only 3% of AISD LEP students mastered all tests taken compared to 10% statewide.

What Are the TAP and ITBS?

The Tests of Achievement and Proficiency (TAP) and the lowa Tests of Basic Skills (ITBS) are norm-referenced tests (NRT's). NRT's are designed to measure student achievement in broadly defined skill areas that cover a wide range of achievement. Scores from NRT's (e.g., percentiles and grade equivalents) compare a student's performance with that of a nationwide sample of students at the same grade. Definitions of these key words appear on the inside cover of this report.

In order to determine how a school district performs in comparison to the nation, national norms provided by the test publishers are used. The most accurate comparisons are made with the most current norms available. This year, AISD scored the ITBS and TAP with the 1988 norms.

Up to 1986, achievement results in AISD were reported in terms of 1982 norms. In 1987 and 1988, achievement in grades K, 1, and 2 was reported in terms of 1985 norms, and achievement in grades 3-12 was reported in terms of 1982 norms. From 1989 on, achievement at all grades was reported in terms of 1988 norms. *Previous achievement results have been converted to 1988 norms* through conversion tables provided by the test publisher. This conversion allows for direct comparisons of achievement from year to year using the same standards. Therefore, changes in achievement as presented in this publication have been adjusted to minimize changes attributable to differences in norming years.

TEA has adopted the ITBS and the TAP as the NRT to be administered statewide to students in grades 3-11 from 1991-92 to 1994-95. New forms of the test and more current national norms will be developed for the statewide testing program.

ITBS and TAP Changes Over Time

Longitudinal Trends

The ITBS has been administered districtwide in AISD for 12 years, from 1979-80 to 1990-91. The TAP has been administered in AISD for 8 years, from 1983-84 to 1990-91. Achievement levels, as measured by the ITBS and TAP, have risen since the baseline years.

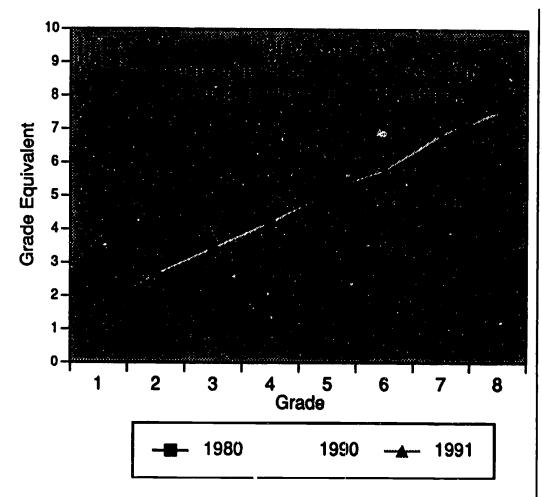

Figure 14
Composite Score Changes From 1980 to 1990.
ITBS Grade Equivalent Gains in 1988 Norms.

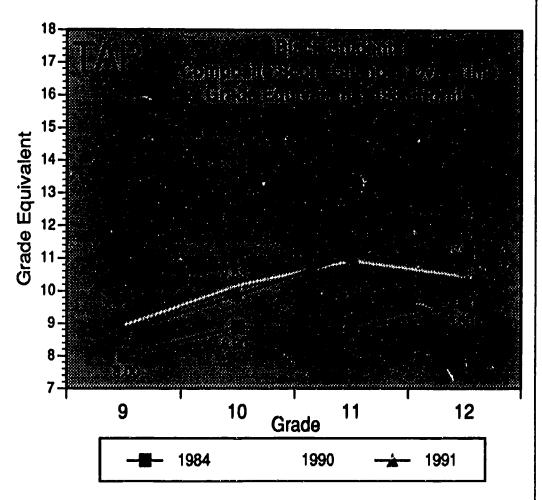

Grade	Black	Hispanic	Other
1	.32	.32	.35
2	.54	.62	.38
3	.83	.61	.50
4	.90	.81	.35
5	.72	.85	.51
6	.81	.93	.96
7	1.54	1.44	.83
8	1.90	1.70	1.19

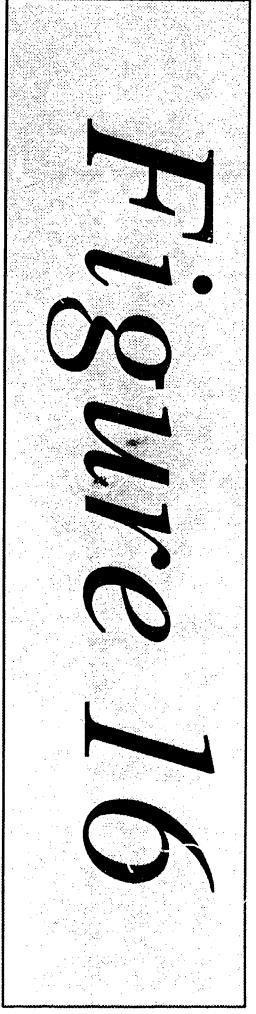

Minority student achievement averages have risen at a substantially higher rate than nonminority student averages. While the achievement scores of nonminority students have increased, the achievement of both Black and Hispanic students has increased at a higher rate, thus narrowing the achievement gap between these groups of students. Figures 14 through 18 present the gains in grade equivalents for the three groups.

Figure 15
Composite Score Changes from 1984 to 1990.
TAP Grade Equivalent Gains in 1988 Norms.

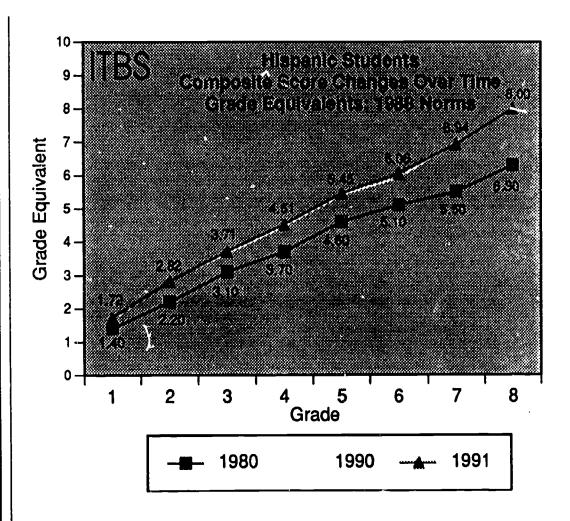

Black	Hispanic	Other
.77	.76	.39
.98	1.45	.91
2.29	1.49	1,12
1.08	1.68	.58
	.77 .98 2.29	.77 .76 .98 1.45 2.29 1.49

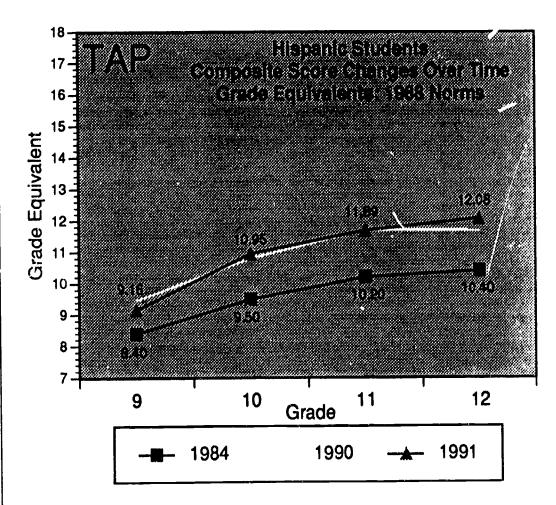

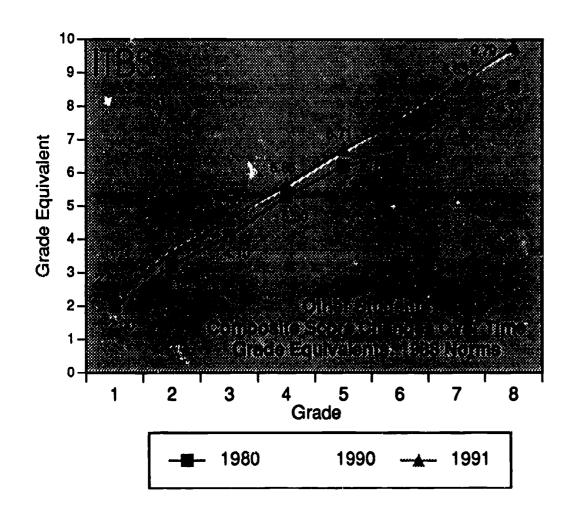

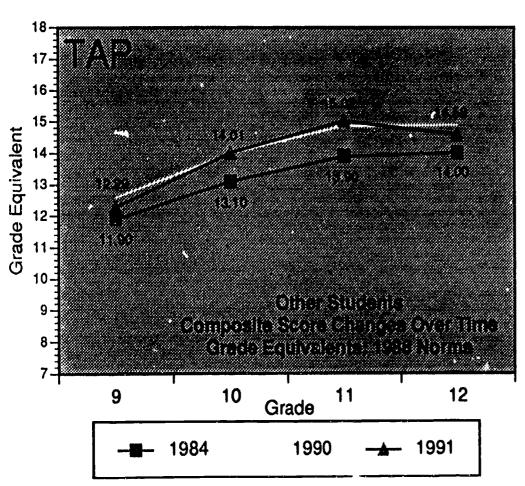

Two-Year Trends

Figure 19 presents the two-year trends for all test areas for all students tested. Figure 20 shows the two year trends by grade span and ethnicity.

Figure 19 Two-Year Trend by Grade

Grades at which 1991 achievement, in comparison to 1990 achievement:

	Grades at which 1991 achievement, in comparison to 1990 achievement:

How Does AISD Student Achievement Compare to the National Average?

In 1990-91, 57 out of 68 average test scores were at or above the 50th percentile, the national average (Figure 20). Figure 21 is a summary showing the grades at which the students obtained the highest scores and the lowest scores.

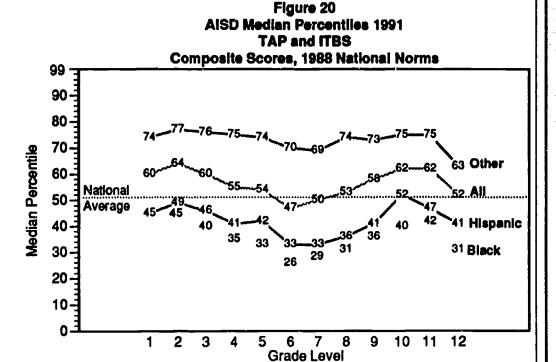

Figure 21 **Highest and Lowest Performance on ITBS for All Students Tested Highest Averages Lowest Averages Grades Grades** 6, 7, 8 Mathematics (ITBS) Mathematics (TAP) Language Written Expression 3, 6, 7 Reading Comprehension Reading Word Analysis/Work-Study Skills 1, 2 6, 7 Using Sources of Information 10,11 11 12 **Social Studies** 10,11 Science

Figure 22 Highest and Lowest Performance on ITBS/TAP for Hispanic Students

Figure 23 Highest and Lowest Performance on ITBS/TAP for Black Students

How Did Minority Students Perform on the TAP and ITBS?

Minority student achievement is below the AISD average at all grades and is generally below the national average (see Figure 20). However, some minority students score in the highest ranges of the ITBS and TAP, above the average for nonminority students in AISD. Figures 22 and 23 show the highest and lowest averages for minority groups in AISD.

How Does Student Achievement Compare to 1988 Urban Averages?

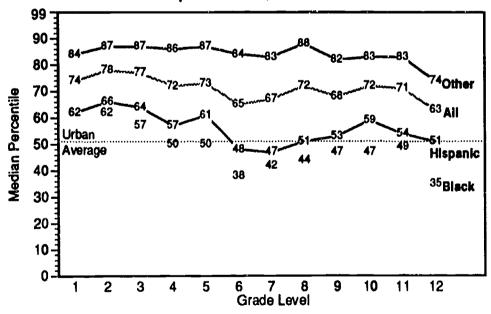

AISD achievement in grades 1-12 is well above the average for other urban districts in 68 out of 68 comparisons* (see Figure 24 and Attachment 6).

Composite scores for Black students in grades 1-5 were at or above the national average for all students in urban districts. Black students scored at or above the urban average in 26 out 68 subtest comparisons.

Composite scores for Hispanic students in grades 1-5 and 8-11 were at or above the national urban averages. Hispanic students scored at or above the urban average in 54 out of 68 subtest comparisons.

Composite scores for Other students were higher than 80% of all students in urban districts nationwide at all grades with the exception of grade 12. Other students scored at or above the 74th urban percentile in all 68 subtest comparisons.

Figure 24
AISD Median Percentiles 1991
TAP and ITBS
Composite Scores, 1988 Urban Norms

^{*}The 68 comparisons include reading, language, word analysis/work-study skills, mathematics, and composite for grades 1-8 and reading, mathematics, written expression, using sources of information, science, social studies, and composite for grades 9-12.

19

Achievement of Limited-English-Proficient Students

Two-Year Trends

This section presents the results of LEP students on the ITBS and TAP.

AISD has LEP students representing 57 different language backgrounds. The largest language groups represented are Spanish and Vietnamese. Results for these students are presented here.

Total LEP enrollment at of January 1991 was 5,706. There were 1,935 LEP students tested in spring of both 1990 and 1991.

Of those tested in both years:

- A majority of Spanish-speaking (71%) and Vietnamese-speaking students (60%) had been in AISD four or more years.
- 52% of Spanish-speaking and 92% of Vietnamese-speaking students are listed as dominant in their home language.
- Almost half (49%) of the Spanish-speaking students and 40% of the Vietnamese-speaking students were served in bilingual programs. Over one third (40%) of Spanishspeaking students and half (50%) of Vietnamese-speaking students were served in ESL programs.

Spanish-Background LEP Performance

Spanish-speaking LEP students in 1990-91 scored:

- Highest in mathematics at 11 of 12 grades (except grade 3 where language is highest)
- Lowest in reading at all grades (except grade 11, where language was lowest)

Gains between spring, 1990 and spring, 1991, for students with Spanish language backgrounds in grades 2-12 in 1990-91, exceeded 1.0 grade equivalents (GE):

- At 4 of 11 grades in language
- At 5 of 11 grades in reading
- At 3 of 11 grades in mathematics

Language and reading showed stronger gains above 1.0 GE than mathematics. Grade levels that appear to need extra attention include 6, 9, 10, and 11 with gains of less than 1.0 GE in all three subject areas. By contrast, students at grades 2 and 5 made gains of more than 1.0 GE in all three subject areas.

English (D. E)	26%

Programs:

Bilingual	49%
EŠL	40%
LAMP	6%
Special Education	1%
Other	4%

Vietnamese-Background LEP Performance

Trends in the Vietnamese data must be interpreted cautiously, especially by grade, because the number of students tested is quite small. Changes could be the result of individual fluctuations rather than group differences. In spring 1991, students from grades 2 through 12 scored (Attachment 7):

- Highest in mathematic at 8 of the 11 grades;
- · Highest in language at 3 of the 11 grades;
- Lowest in reading at 8 of the 11 grades.

Gains between spring, 1990 and spring, 1991, for Vietnamesespeaking students in grades 2-12 in 1989-90, exceeded 1.0 grade equivalents (GE) in 19 of 33 comparisons:

- 6 of 11 grades in language
- 6 of 11 grades in reading
- 7 of 11 grades in mathematics

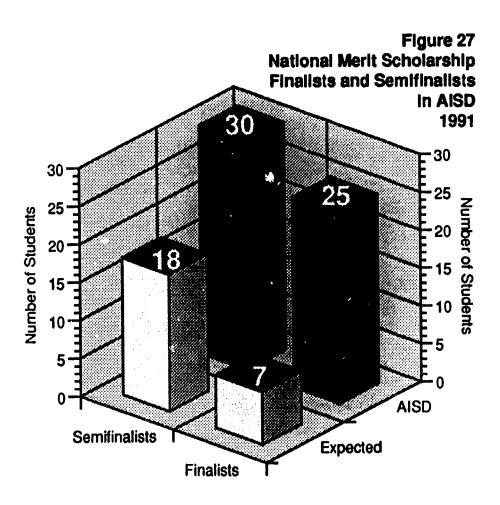

Vietnamese-speaking LEP students at grades 2, 6, and 7 made gains of more than 1.0 GE in all three subject areas.

How Did AISD Students Compare to Others Taking College Admission Tests?

- AISD seniors who take the Scholastic Aptitude
 Test (SAT) score higher than do students nationwide and statewide.
- AISD had 25 National Merit Scholarship finalists in 1991. This represents 3.6 times the expected number for a district of this size.
- AISD had 30 National Merit Scholarship semifinalists in 1991. This represents 1.7 times the expected number for a district this size (Figure 27).
- The number of finalists and semifinalists for AISD has declined dramatically from 1989 to 1991.

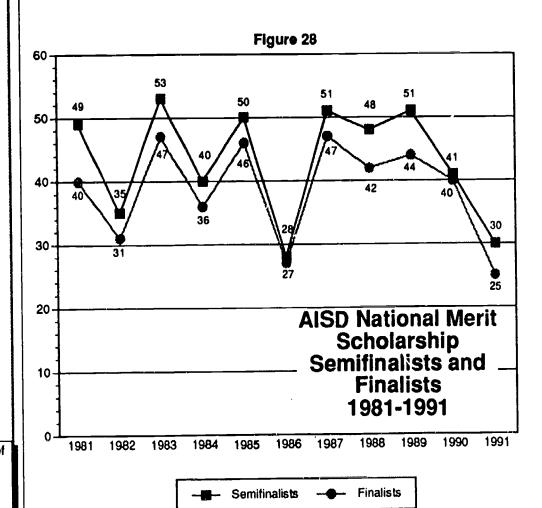

Although a higher percentage of AISD's seniors generally take the Scholastic Aptitude Test (SAT) compared to seniors nationwide, AISD's average scores are higher than the national averages (see Figures 29 and 30 and Attachment 8).

The SAT mathematics scores of AISD students decreased two points last year, while the national scores remained the same. In the mathematics section, AISD scored 13 points higher than the national average and 28 points higher than the state average. The verbal scores of AISD students remained unchanged from last year, while the national scores decreased by three points. In the verbal section, AISD scored 15 points higher than the national average and 26 points higher than the state average.

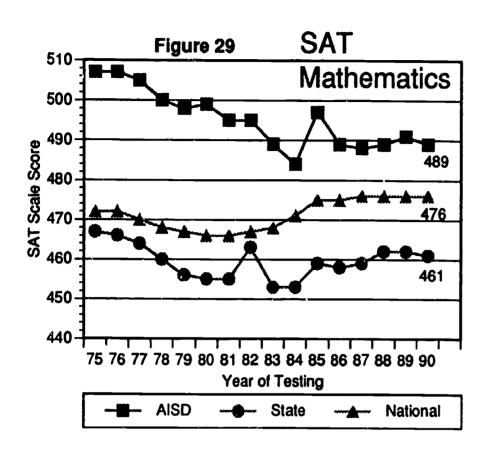

Each year, many AISD students take the National Merit Scholarship Qualifying Test, also known as the Preliminary Scholastic Aptitude Test, in their junior year. The numbers of National Merit Scholarship semifinalists and finalists for the past ten years are shown below in Figure 28. Of the juniors tested in 1989-90 (1,467), 30 became semifinalists and 25 became finalists. AISD's number of finalists is 3.6 times higher than the expected number and the number of semifinalists is 1.7 times higher than the expected number using the national rate for a district this size.

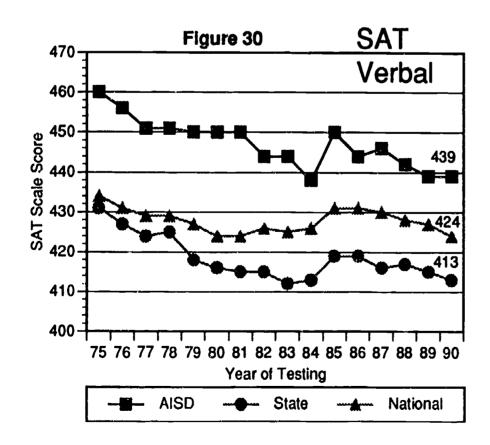

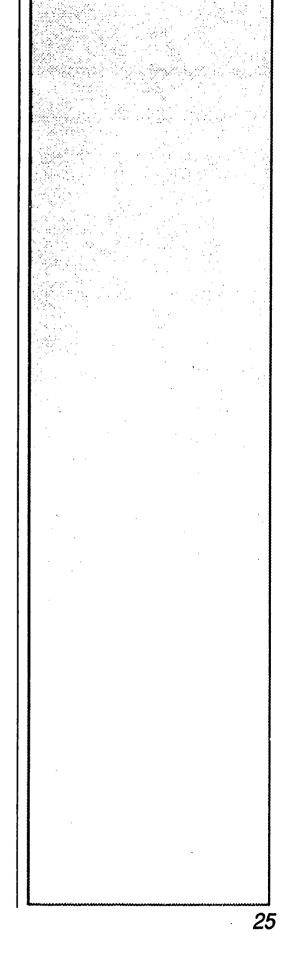

The College Board calculates the number of finalists and semifinalists as follows:

Finalists = 0.5% of students tested Semifinalists = 1.2% of students tested

Bibliography

TAAS Technical Information

Objective Mastery is the number of items that a student must answer correctly to demonstrate competency in the skills targeted by the instructional objective.

Minimum Skills Mastery is equivalent to that of the 1989-90 TEAMS standards. This information will be provided after the October administration for longitudinal studies of campus and district results.

Academic Skills Mastery represents the TAAS passing standard. For Grade 3 (including the Grade 3 Spanish version) and Grade 5, approximately 65% of the test items correct is

passing; for Grades 7, 9, and 11, the standard is approximately 60% of the items correct. On the language arts writing test, a student must also obtain a passing score of at least 2 on the written composition. The minimum number of items required is shown along with the total number of items on the test.

Academic Recognition Standard is an even higher, more challenging level of achievement in which a student masters all objectives on the test. In writing, the student must also achieve the highest score (4) on the written composition. The number of items displayed is the minimum required to meet this standard, assuming all objectives are mastered.

		Grade 3*	Grade 5*	Grade 7*	Grade 9	Grade 11*

Metropolitan Readiness Test

September 4-14*

Grade 1

TAAS/TEAMS

October 16-18

Grades 3, 5, 7, 9, and 11 (Exit Level)

TAAS/TEAMS Exit-Level

April 2-4

Grades 11

ITBS

April 23-25*

Grades 1-8

TAP

April 30-May 1*

Grades 9-12

* Make-up testing for ITBS, and MRT was conducted during the 5-7 days after the regular administration. TAP makeups were administered April 27 and May 4. There are no makeups for TAAS/TEAMS.

Who's Tested and Reported in Summaries?

Students Not Included in Testing

Special Education:

Special education students whose Admission, Review, and Dismissal (Ai-D) Committee determined that they should be exempted from all or part of the ITBS or TAP testing.

After administration of the first subtest, LEP students who were dominant or monolingual in a language other than English could be excused from other tests if in the teacher's judgment the students could not understand English well enough to answer about one out of four items correctly (a chance level).

Scores Not Included in Achievement Summaries

Students' scores were excluded from achievement summaries under the following conditions.

ITBS and TAP

Special Education: Scores for special education students who received one or more hours (grades 1-6) of education services per day, or who took the test for experience only.

Limited English Proficient (LEP):
Scores for students who were monolingual or dominant in a language other than English (LEP categories A and B.)

Other: Scores for individual tests which the teachers invalidated because they were not completed due to extenuating circumstances.

TAAS/TEAMS

Special Education: Scores for special education students who took the test even though exempted by their Admission, Review, and Dismissal (ARD) Committee or took the test for experience only.

Invalid: Scores for individual tests which the teacher marked DO NOT SCORE because of a circumstance which makes the scores invalid.

Note's

The Calculation of Median Scores

The median scores (percentile and grade equivalents) were calculated by determining the point which divides the ranked scores into halves. The procedures used for calculating this interpolated point on a continuum can be found in the 1981-92 Systemwide Evaluation Technical Report (ORE Publication Number 81.24, Appendix E).

Comparisons to Reports from Previous Years

In 1986-87 and 1987-88, results for grades K, 1, and 2 were reported in 1985 norms and grades 3-12 in 1982 norms. In 1988-89, all scores were reported in 1985 norms. Beginning in 1989-90, 1988 norms were used. All previous years scores were recalculated using 1988 norms for this report. The median percentile and grade equivalent scores presented here are calculated independently using 1988 norms for all grade levels. Each year some test records are updated by adding missing student information.

Anomalies

Over the past years, ORE staff members have noted several anomalies which may be present in achievement test data. For more information on anomalies in achievement data, please refer to ORE Publication Number 81.60, Anomalies in Achievement Analyses and ORE Publication Number 87.26, Six of One Is Greater Than Half a Dozen of Another: Strange Phenomena in Achievement Tast Results

Rounding

Numbers reported here are rounded to the most appropriate decimal place. Rounding can cause some calculations to appear to be incorrect. Total group medians and gains for groups are calculated independently rather than summed from previously rounded numbers.
